Sir:

Intel Corporation represents that it is Assignee of the entire right, title and interest in
and to the instant application and U.S. Patent No. 6,703,625 issued March 9, 2004, entitled
"Methods and Apparatus for Off-Axis Lithographic Illumination."

Assignee disclaims, except as provided below, the terminal part of the statutory term
of any patent granted on the instant application, which would extend beyond the expiration
date of the full statutory term defined in 35 U.S.C. 154 to 156 and 173, as presently shortened
by any terminal disclaimer, of prior Patent No. 6,703,625. Assignee hereby agrees that any
patent so granted on the instant application shall be enforceable only for and during such
period that it and the prior patents are commonly owned. This agreement runs with any
patent granted on the instant application and is binding upon the grantee, its successors or
assigns.

In making the above disclaimer, Assignee does not disclaim the terminal part of any patent granted on the instant application that would extend to the expiration date of the full statutory term as defined in 35 U.S.C. 154 to 156 and 173 of the prior patents, as presently shortened by any terminal disclaimer, in the event that it later: expires for failure to pay a maintenance fee, is held unenforceable, is found invalid by a court of competent jurisdictions, is statutorily disclaimed in whole or terminally disclaimed under 37 C.F.R. § 1.321, has all claims canceled by a reexamination certificate, is reissued, or is in any manner terminated prior to the expiration of its full statutory term as presently shortened by a terminal disclaimer.

The undersigned declares that she/he is authorized to make this disclaimer declaration and that all statements made herein of her/his own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

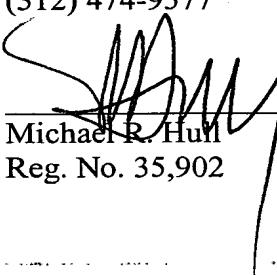

The undersigned is an attorney of record and therefore the certification under 37 C.F.R. § 3.73(b) is not required.

Respectfully submitted,
